INDEX OF SUBJECTS

alkylating agents, 442
allopolyploids, 278-283
aneuploidy, in wheat populations, 601
animal dispersion, 586
apical meristems, 137
Aspergillus nidulans, variant of, 197-209
assortative mating, 267-276
autosomal imbalance in man, 298

Bacillus subtilis, 597
bacterial genetics, 598
behaviour genetics, 585
blood group, applications, 298
breeding, 277-278
breeding marrow-stem kale, 598

cell heredity, 135
cellular regulatory mechanisms, 590
Cepaea, 445-465, 467-476
chromosome, abnormality, 299, 300
  breakage in rye, 427-437
  manipulation, 597
  rearrangements, 299
  with satellite, 144
chromosomes, 603
  congenital anomalies, 143
  of algæ, 302
clonal proliferation, 300
cloning, 533-540
components of continuous variation, 115-133, 211-236
control mechanism, in *E. coli*, 599
cytogenetics of polyploids, 588
cytology, 295

diallel cross analysis, 577-579
diallel, in rye grass, 501-512
DNA analysis, 604
dosage compensation in mammals, 297
Drosophila, 381-407, 561-575
  egg-hatching in, 107-113
Drosophila pseudoobscura, 525-531

episomes, 600
evolution, 442
  in *Maniola*, 237-265
  of man in Africa, 293

fimbriation and rhamnose-fermentation in *Salmonella*, 301

gene frequency, in *Cepaea*, 445-465
  increase, 267-276
  transfer, in *Nicotiana*, 373-379
genes, in the mouse, 297
genetic control of phenotype, 602
  correlation, 303
  factors in *E. coli* K12, 599
  linkage, 442
  significance of DNA, 603
genetical components of variation, 211-236
  investigation of June Yellows, 361-372
genetics and evolution, 591
genetics, of egg-hatching in *Drosophila*, 107-113
  of micro-organisms, 589
  of radiosensitivity, 63-74
  of "sex-ratio" in *D. pseudoobscura*, 525-531
  on the population level, 136
  principles of, 285
  quantitative, 284
genotypes, competitive ability, 381-407
Gossypium, 284
growth, control of, 287

hamster, genetic studies, 477-486
hereditary disease of sheep, 75-105
heredity, 138
heritable change, in *Linum*, 27-61
heteroclones in *Streptomyces coelicolor*, 141
heterozygosis and recombination, 601
hybridisation, 278-283

incompatibility, in populations, 183-195
  in *Theobroma*, 157-182, 183-195
induction, environmental, 27-61
inheritance, of June Yellows, 302
  of life habits, 347-359
  of pseudocholinesterase, 142
interaction, gene, 553-559

lethals, in maize, 409-414

macromolecular complexes, 289
man, daily life habits, 347-359
Maniola, natural selection in, 513-523
Maniola jurtina, evolution in, 237-265
melanotic tumours of *Drosophila*, 561-575
mesosome, 142
metabolism, isoniazid, 603
metagon, in *P. aurelia*, 602
mutagenesis, 596
mutants, complementation, 141
  in *Aspergillus*, 301
mutation, in *S. typhimurium*, 598
mutations, 593

Nicotiana, 373-379
nodulation of *T. ambiguum*, 601

Panaxia dominula, 415-426
pigment restriction, in potatoes, 145-156
plant breeders' rights, 595, 596
plant breeders' royalties, 595
polymorphism, chromosome, 1-26
  in *Panaxia*, 415-426
  in snails, 319-345
potatoes, pigment restriction, 145-156

protein biosynthesis, 288
synthesis, 302
purification of glutamic dehydrogenase varieties, 142

radiosensitivity, genetical control of, 63-74
in tomato, 63-74
recombinant chromosomes, 599
recombination, somatic, 305-318
reversion, in *S. pombe*, 602
in *S. typhimurium*, 598
ribonucleic acid, 597
rye, genetic control, 439-441
rye grass, genetic survey, 501-512

Schizophyllum commune, 305-318
scrapie, disease of sheep, 75-105
selection, directional and centripetal, 487-499
disruptive, 1-26
in *Maniola*, 513-523
in snails, 319-345
in tomatoes, 602
recombination and response, 143
sexual, 541-552
selective values, in *Cepaea*, 467-476
sib-mating, 553-559
sounds of language, 290
spermatogenesis in *Drosophila melanogaster*, 303
strawberries, 361-372
studies on gargoylism, 298

t-alleles in the mouse, 143
tables for workers in genetics, 592
Theobroma cacao, incompatibility in, 157-182, 183-195
transformation, 600
translocation, 299

Ustilago maydis, 300

variance, genetic, 579-583
variant, red, 197-209
variation, components of, 115-133, 211-236
in cloning, 533-540
in development, 427-437
in human populations, 292

white band, in hamsters, 477-486

INDEX OF AUTHORS

Apirion, D., 301
Arlett, C. F., 197-209

Bailey, N. T. J., 442
Barigozzi, C., 561-575
Bateman, A. J., 107-113
Beale, G. H., 142
Beddows, A. R., 501-512
Bell, G. D. H., 595
Bennett, J. H., 525-531
Bevan, E. A., 141
Bianchi, A., 409-414
Bond, G., 602
Bonsall, G. W., 115-133
Breese, E. L., 501-512
Brosnahan, L. F., 290
Brown, W. M. Court, 300
Buckton, K. E., 300
Bullen, M. R., 604

Callan, H. G., 302
Chandley, A. C., 303
Chiarelli, B., 347-359
Clarke, B., 319-345, 445-465, 467-476
Clarke, C. H., 602
Clowes, F. A. L., 137-138
Clowes, R. C., 600
Conterio, F., 347-359
Cook, L. M., 415-426
Cooke, P., 115-133, 211-236, 381-407
Cope, F. W., 157-182, 183-195
Crawfurd, M., 143
Creed, E. R., 237-265

Dalebroux, M., 579-583
Davies, D. R., 63-74
Dawson, G. W. P., 588, 598
Donachie, W. D., 602
Dowdeswell, W. H., 237-265, 513-523
Duguid, J. P., 301
Durrant, A., 27-61

Edds, M. V., *editor*, 289
Edwards, A. W. F., 277-278
Edwards, J. H., 298
Ellerton, S., 595
Ellis, J. R., 144
Evans, A. M., 601
Evans, D. A. P., 603

Falconer, D. S., 284
Fincham, J. R. S., 142
Ford, C. E., 300
Ford, E. B., 237-265
Fuller, J. L., 585

Gahan, P. B., 603
Gall, J. G., 302
Gardner, E. J., 285
Gibson, I., 142, 602
Gibson, J. B., 1-26, 143
Godward, M. B. E., 302
Grindle, M., 197-209
Gross, J. D., 599

Halfer, C., 561-575
Hamerton, J. L., 603
Hamper, J., 298
Harnden, D. G., 299
Harris, R. J. C., *editor*, 288
Harrison, G. A., *editor*, 292
Haskell, G., 602
Hayward, M. D., 439-441
Holliday, R., 300
Hopwood, D. A., 141
Howard, H. W., 145-156
Hume, V. B. M., 301

Jacobs, P. A., 299
James, J. W., 487-499
Jinks, J. L., 197-209
Jones, D. G., 601
Jones, R. M., 115-133
Jund, E., 533-540

Kacser, H., 602
Kelly, M. S., 600
Kimber, G., 597, 601
Klinger, H. P., 603
Kurth, G., *editor*, 442

Leakey, L. S. B., 293
Lehmann, H., 142
Leslie, L., 597
Lewis, B., 501-512
Lewis, E. B., *editor*, 591
Libby, W. J., 533-540
Liddell, J., 142
Lyon, M. F., 143, 297

McWhirter, K. G., 237-265
Marshall, R., 144
Mather, K., 115-133, 211-236, 381-407
Maynard-Smith, S., 592
Mittwoch, U., 298
Moav, R., 373-379
Monk, M., 599
Morandi, A., 409-414
Morrison, J. H., 295
Morton, J. R., 553-559
Muir, H., 298
Murray, J., 445-465, 467-476
Mutton, D., 603

Nelder, J. A., 115-133

O'Donald, P., 541-552, 553-559
Old, D. C., 301

Palmer, T. P., 277-283
Parag, Y., 305-318
Parry, H. B., 75-105
Parsons, P. A., 267-276
Penrose, L. S., 144, 592
Poole, F., 601
Pritchard, R. H., 600

Race, R. R., 298
Rasmusson, M., 136-137
Rees, H., 427-437, 577-579, 604
Riley, R., 597, 601
Ritchie, D. A., 601
Riyasaty, S., 598
Robertson, F. W., 303
Robinson, R., 477-486
Ross, W. C. J., 442
Ryan, F. J., 135-136

Sagar, R., 135-136
Sanger, R., 298
Saunders, J. H., 284
Scaife, J., 599
Schull, W. J., *editor*, 593
Searle, A. G., 297
Sermonti, G., 141
Sgorbati, G., 561-575
Sheppard, P. M., 415-426
Silk, E., 142
Smith, C. A. B., 592
Smith-Keary, P. F., 598
Stocker, B. A. D., 301, 597
Subbaiah, T. V., 301
Sun, S., 577-579
Symonds, N., 601

Thoday, J. M., 1-26, 143
Thompson, K. F., 598
Thompson, W. R., 585
Tippett, P., 298
Tough, I. M., 299

Walker, S., 299
Watts-Tobin, R., 596
Weibull, W. G., 596
Wigglesworth, V. B., 287
Williams, J. A., 299
Wills, A. B., 302, 361-372
Wilson, G. B., 295
Winchester, A. M., 138-139
Woods, R. A., 141
Wynne-Edwards, V. C., 586
